PROFESSIONAL SUMMARY

Dynamic Full-stack JavaScript bootcamp graduate with a unique blend of technical and interpersonal skills honed through diverse professional experiences. Proven ability to solve complex problems, communicate effectively, and collaborate in cross-functional teams. Leveraged these skills in a compassionate role as a Program Manager, demonstrating the capacity to understand user needs deeply, much like in software development. Now seeking to apply my coding skills, problem-solving capabilities, and strong empathy towards user experiences in a Junior Software Developer role. Passionate about using technology to create intuitive solutions that make a meaningful impact.

SKILLS

- JavaScript
- MySql
- Social perceptiveness
- NodeJS
- ExpressJs
- Self motivation
- React
- Git
- Relationship Building

EXPERIENCE

APRIL 2020-JUNE 2022
Launch Operator/ Deck Hand
Sagamore Yacht Club | Oyster Bay, New York

- Worked effectively in a team environment, regularly coordinating with others for daily tasks - a critical skill in software development projects.
- Utilized strong problem-solving skills in maintaining club facilities and repairing moorings, comparable to debugging and fixing issues in software applications
- Showcased adaptability by performing various roles, from driving launch boats to club maintenance, reflecting the ability to quickly learn and adapt to new technologies and practices in software development.

DECEMBER 2018-APRIL 2020
Program Manager/ Behavioral Health Technician
Choice House LLC | Boulder, Colorado

- Led group sessions teaching meditation and communication techniques, fostering enhanced self-awareness and emotional intelligence.
- Regularly collaborated with therapists to address individual needs and development strategies, demonstrating strong teamwork and problem-solving skills, crucial in software development projects.
- Employed a deep level of compassion, active listening, and guidance to help individuals navigate their challenges. Similar empathy-based skills are invaluable in understanding end-users experiences and building more intuitive software solutions

JANUARY 2019-APRIL 2019

Apprentice Electrician
Power Design | Denver, Colorado

- Demonstrated quick learning capabilities by grasping new concepts and techniques in the electrical field, indicative of an ability to rapidly acquire new technical skills, a crucial attribute in the ever-evolving tech industry.

- Worked collaboratively within a team to complete projects efficiently, refining interpersonal and team collaboration skills necessary in a software development environment.

- Followed strict safety regulations and standards, showcasing a meticulous attention to detail and respect for established procedures, much like adhering to coding standards and best practices in software development.

MAY 2018-DECEMBER 2018
Baker/ Commissary Driver
Alfalfas | Louisville , Colorado

- Flourished in various roles, proving a capability to learn quickly and improve continuously, traits highly valued in the rapidly evolving tech industry.

- Oversaw the operations of a bakery in a top-tier grocery store, demonstrating excellent attention to detail, organization, and time management skills, mirroring the precision and methodical approach needed in coding and software development.

- Promoted to a corporate role as a commissary driver and event worker, illustrating the ability to adapt to new roles and responsibilities, an important quality in the dynamic world of software development.

- Acted as a communication link between different departments and store locations, refining interpersonal and communication skills.

NOVEMBER 2016-JANUARY 2018
Grace Estate

- Managed, worked on and maintained family's separate estates in Oyster Bay long island and Upper East Side Manhattan.

JUNE 2014-NOVEMBER 2016
Boathouse Assistant, Dock Hand And Launch Driver
Cold Spring Harbor Beach Club

- Helped members maintain their boats as well as prepared them for winter storage.

EDUCATION

High School	June 2010
Oyster Bay High School, Oyster Bay, NY	
Certification - Software Engineering	July 2023
UT Austin Coding Bootcamp, Austin, TX
